The fight against the Black Borer will be among the main highlights in the lecture part of the "Danube Orchardists" exhibition in Ruse.

On November 15, in the "Arena Ruse" hall, the "Union of Danube Orchardists" association organizes the "Danube Orchardists 2025" exhibition with the support of the Ministry of Agriculture and Food and the State Fund "Agriculture".

During the exhibition, several different zones will be set up where producers, traders, and craftsmen can display their products and establish business contacts. In the B2B zone, exhibitors will have the opportunity to meet potential partners and clients.

The farmers' market, in turn, will showcase a rich variety of fresh and processed products – dried fruits, juices, nectars, jams, honey, nuts, wine, and many other delicious offerings, created with labor and tradition by the Danube orchardists.

The current topic – the fight against the black borer, which destroyed many of the plantations in the region, will be a leading theme in the lecture part of the exhibition, dedicated to practical presentations and discussions on innovations and challenges in the industry.
