Principal® Gold – Modern control of cereal and broadleaf weeds in corn

Author(s): Corteva Agriscience™
Date: 03.04.2026 *Issue:* 4/2026

Weed control in maize is crucial for protecting yields, and **Principal® Gold** from **Corteva Agriscience** offers the best solution for full control with just one application.

After only **two years on the market**, the product has **established itself as the preferred solution** for controlling grass and broadleaf weeds in maize, thanks to its reliable efficacy, excellent selectivity, and application flexibility.

Efficacy and Selectivity in One

ISSN 2815-522X

Principal® Gold combines three active ingredients – **nicosulfuron, rimsulfuron, and dicamba**, which act synergistically to destroy a wide spectrum of weeds, including johnsongrass from rhizomes and black nightshade.
Thanks to the built-in safener, the product guarantees **100% crop selectivity** and can be applied up to the **9-leaf stage**, which provides great treatment flexibility and peace of mind for farmers.

Application Rate

48 g/decare + 0.1% adjuvant Vivol™ 90
This combination ensures maximum penetration and rapid action on weeds, even under high density and difficult climatic conditions.

Exceptional Field Results

Principal® Gold provides **complete weed control up to the 14th day after treatment**. Farmers across the country confirm that the product maintains its efficacy even under high temperatures and variable growing conditions.
These results have established **Principal® Gold** as the **#1 herbicide for weed control in maize**.

Advantages of Principal® Gold:

- One herbicide for controlling broadleaf and grass weeds
- Wide application window – from the 2nd to the 9th leaf
- Rapid initial effect, visible as early as the second day after treatment
- Suitable for early-season control without using a soil-applied herbicide
- Effective even as a corrective treatment
- No restrictions for subsequent crops in the rotation

Principal® Gold – a proven partner for Bulgarian farmers!
In just two years, the product has become the **benchmark for efficacy, selectivity, and safety** in weed control in maize.
