NEW SOIL HERBICIDE FOR CONTROL OF GRASS AND BROADLEAF WEEDS IN CEREAL CROPS from Summit Agro

ROXY HL is a selective systemic herbicide containing 900 g/l prosulfocarb.

ADVANTAGES OF ROXY HL:

✅ controls both grass and broadleaf weeds simultaneously;

❗ high efficacy against resistant grass weeds such as ryegrass species;

✅ excellent selectivity to crop plants (including barley);

✅ suitable for both soil and early post-emergence application (up to the 3rd leaf stage of the crop);

✅ suitable for use in winter wheat (soft and durum), winter barley, winter rye, triticale, and potatoes;

✅ excellent tool for resistance management due to its different mode of action;

💦 Dose: 260 - 350 ml/da

❗💯 To broaden the spectrum of action and control all economically important grass and broadleaf weeds, **ROXY HL** can be combined with **DIFLANIL SD**.
