HUMIPOWER is a new highly concentrated organic soil improver based on natural potassium humate.

Thanks to its high content of humic and fulvic acids, **HUMIPOWER** improves soil structure, nutrient retention and uptake, and stimulates the development of a powerful root system.

ADVANTAGES OF **HUMIPOWER**:

High concentration: contains 65% humic extract + 9.5% water-soluble potassium (K_2O) + 36% organic carbon (C)

Improves soil structure and quality and promotes its microbial activity;

Stimulates the root system and improves nutrient retention and uptake in the soil;

Extremely flexible application: during sowing, after sowing - before or after emergence, as well as during the vegetation period;

Dose: 30-100 g/daa

Maximum safety: when the recommended doses are observed - NO restriction on the number of applications;

Excellent compatibility: compatible in tank mix with most soluble fertilizers and plant protection products.

For more information and advice on application, contact the specialists at Summit Agro!
