In connection with the upcoming autumn campaign in 2026, IRGR Sadovo offers for sowing the varieties developed by them, by crops and categories.

They are of interest to all those engaged in seed production for trade or for their own needs, as well as to those who are already convinced that sowing with quality seeds of suitable varieties is one of the most important prerequisites for obtaining high results.

The Institute in Sadovo is not only the patented owner of these varieties, which are widespread throughout the country, but also a licensed seed producer registered with IASAS.

IRGR Sadovo is included in the lists of the State Fund “Agriculture” for the provision of seeds under all lines, as well as provides an opportunity for participation in the interventions for promoting the use of crops and varieties resistant to climate change.

The prices for 2026 determined at the Institute are as follows:

- For basic seeds of wheat, triticale, rye, oats and barley – 500 €/t excluding VAT.

- For wheat, triticale, rye, oats and barley C1 – 400 €/t excluding VAT,

- For basic seeds of winter peas – 1500 €/t excluding VAT.

- For winter peas C1 – 1250 €/t excluding VAT.

It is advisable to first make a request by e-mail or telephone for the preferred varieties, category and required quantities. If interested, you can also receive consultation on the choice of a variety suitable for your region.

Everyone who has purchased seeds from IRGR Sadovo will receive brief recommended varietal cultivation technology for the 2026/27 season.

Crops, varieties and seed categories offered in 2026 by IRGR Sadovo

№	КУЛТУРА	СОРТ	КРАТКА ХАРАКТЕРИСТИКА	КАТЕГОРИЯ СЕМЕНА
