On 9 October from 10:00 to 12:00 an online seminar will be held on the topic: „Regenerative Agriculture in Organic Vegetable Production“.

During the seminar, Assoc. Prof. Dr. Plamena Yankova, Technical University – Varna will introduce the participants to the new technologies and the practical application of regenerative and organic methods for managing soil fertility and vegetable crops. Key technological elements in organic vegetable production will be presented, such as minimum soil tillage (No-till/Strip-till); use of cover crops (Cover Crops); biological control and plant protection; application of high-quality compost, green manure and use of innovative biostimulants to enhance the immunity of vegetables.

In the second part of the seminar, the opportunities for supporting agricultural holdings under intervention II.D.1 „Start-up aid for the establishment of young farmers in agriculture“ from the Strategic Plan for the Development of Agriculture and Rural Areas (SPDARA) 2023 - 2027 will be presented.

The organisers of the seminar are the National Agricultural Advisory Service, Territorial Regional Office (TRO) - Varna and the Technical University – Varna.

Participation is free of charge, but prior registration is required!
